

Specifications: MG4

Mounting hardware included

Nominal Impedance	16 Ohm
Sensitivity dB @ 2.83V/1M	83.0 dB
Recommended Power	15 - 50 Watts
Max. Power SPL @ 1 M	103 dB
Transducer - Low Frequency Driver	4" Polypropylene Cone with Butyl Rubber Surround
Transducer - High Frequency Driver	1" Convex Titanium Tweeter w/ Waveguide
Colors	Brown
Enclosure alignment	Sealed
Grille - material	Powder Coated Aluminium
Height (SM = Height)	450.9mm / 28.5"
Diameter (SM = Width)	142.9mm / 9.75"
Depth	190.5mm / 7.5"
Regulatory - CE	approved
Regulatory - RoHS	approved

Description

Rockustics' MusicGarden MG4 speaker is a 4" spike-mounted landscape speaker that is part of the MusicGarden system. Four MG4 units are included in the MusicGarden system, as well as one MG SUB8 subwoofer. Additional MG4 satellites may be added to expand the size of the system. MusicGarden speakers are available in Brown.

Patented Phase Technology Technologies

Phase Technology and MSE Audio Group constantly develop new technologies that enhance audio product performance. Phase Technology innovations are protected by multiple U.S. and international patents, which explicitly cover Phase Technology dispersion, enclosure and dome technologies. MSE Audio Group actively defends its patents in order to protect Phase Technology resellers and end users.

Technical Data and Specification

Tools

Technical Data

Phase Technologies strives to provide complete and effective technical information and data to dealers, engineers and designers. All data are available from SoundTube Entertainment or at www.soundtube.com. Technical data and downloads include: EASE™ data - 3-D polar plots. EASE™ Address - 2-D modeling for distributed systems Autodesk® Revit® software Tech Sheets - Technical information and architectural specs for system engineers SoundTubeSPEC™ - Proprietary speaker placement software

Data Acquisition and Verification

All data for Phase Technologies speakers are independently collected from and verified by NWAALabs (www.nwaalabs.com) using their proprietary MACH testing system. All data are collected and analyzed according to ASTM, ISO and AES standards using EASRA, TEF and MLSSA. Full balloon data including both phase and magnitude are

compiled into a variety of formats including EASE 4.x, GLL and CLF.
