

# PHASE VELOCITY

PHASE  
TECH  
MSE AUDIO

V52 • V62 • V626 • V5520 • V-SURROUND-II

Named for its stylish and streamlined exterior, the Phase Velocity series delivers incredibly accurate audio reproduction. The series includes bookshelf, tower, and surround models, providing a speaker for any need in any room.

An alluring speaker means nothing without sound quality to match. Simply put, these speakers sound just as stunning as they look. Phase Technology's patented soft dome tweeter reproduces silky smooth and defined high frequencies, making it the perfect complement to the VDT™ (Vapor Deposited Titanium) woofer that produces extraordinarily bass and mids. The VDT woofers are made of a very light weight, injection molded material with a titanium coating which allow it to produce extraordinary quick bass and crystal clear mids. Featuring PhaseTech's signature Absolute Phase® Crossovers, Phase Velocity speakers ensure that you will get incredible performance at an affordable price.
