

CI-MM3-II • CI1.5 • CI15

Phase Technology's Spacia™ series redefines space and sound by providing high performance audio from compact speakers that virtually disappear wherever they're installed.

Spacia™ models are weather-resistant, making them ideal for a wide variety of indoor and outdoor locations. They offer a unique multi-room music distribution option in place of large in-wall or conventional in-ceiling speakers. They work well in patio/pool areas outside, as well as in living rooms, dens, bedrooms, kitchens, bathrooms, hallways, and in shower areas, master closets, and dressing rooms.
