Description:

The CI6.0 IX QM is a 6.5" coaxial in-ceiling speaker.

The 1" variable axis tweeter allows high frequencies to be directed to the listener in situations where placement is less than optimal, such as rooms with vaulted ceilings.

An optional micro-flange grille allows for 0.25" of the speaker's flange to be seen to blend more seamlessly with the ceiling.

Features:

- One 6.5 inch polypropylene with rubber surrounds and one 1 inch variable axis soft dome tweeter
- Separate flange can be installed first and the speaker added later
- Limited Lifetime Warranty
- Absolute Phase Crossover Network
- Magnetic Micro-Flange Grilles

Applications:

Engineered for home theater or distributed audio applications indoors or out (as long as it is not exposed to direct heavy weather). The CI6.0 IX QM pairs with Phase Velocity's V52, V62, V626 and V5520.

Warranty Information:

The CI6.0 IX QM comes with a limited lifetime warranty. Products not sold through an authorized dealer/distributor will not be supported by the factory warranty. Warranties are non-transferable.
