PC1.5 • PC33.5 • PC3.5 • PC9.5 • PC-SURROUND-II • PC60 CA

Combining a sleek exterior with innovative technology, Premier Collection (PC) speakers express the natural character, timbre and ambience of recorded sound. Whether you're listening to a classic cello performance or an action-packed Hollywood blockbuster, PC speakers deliver unmatched realism and clarity for an immersive listening experience and reproduce content so accurately you will feel like you're front row center at your favorite concert hall or movie theater.

Absolute Phase® crossovers ensure that each driver will produce only the frequencies for which it was designed, while also keeping the drivers electrically and acoustically in phase with one another. Yet, engineering our flagship line did not end with crossovers: PC speakers also incorporate patented RPF® flat-piston woofers, developed in house by PhaseTech engineers, these innovative woofers utilize a tri-laminate of Kevlar, RPF, and glass fiber (patent #4566178) that match the speed and accuracy of our soft dome tweeters. Not only are the RPF drivers capable of accelerating quickly to high acoustic levels while producing crystal-clear sound at any volume, they also generate a much larger dispersion pattern in both the horizontal and vertical plane. These proprietary drivers inhibit the "break-up modes" that deteriorate clarity and smoothness. The result is a speaker that produces seamless transitions from the lowest frequencies to the highest, making them disappear into the room.

The innovative, and stylish Premier Collection series represents the highest expression of all PhaseTech's 60 plus years of experience in speaker design and manufacturing.
